> Re: U.S. Patent Application Serial No. 08/259,413 Filed June 16, 1994 and Entitled Pegylation Reagents and Compounds Formed Therewith; Your Ref: SXNE-210C - Our Ref: 4848-4

Dear Theresa:

We have received a copy of your correspondence to Dr. Harris of August 23, 1994, requesting that Dr. Harris execute a joint declaration and power of attorney directed to the above identified proposed patent application (the "CIP"). As we are informed, Synargen filed the proposed CIP in the U.S. Patent and Trademark Office on June 16, 1994 and the application has been assigned U.S. Serial Number 08/259,413

Please be assured that we are committed to working with Synergen and have every desire to cooperate with synergen for mutual success. However, in our opinion, the CIP as proposed is not in the best interests of either Synergen or Shearwater. not in the best interests of either Synergen or Shearwater.

As we have discussed in the past, Dr. Harris and we at the firm have some concerns about the proposed CIP application. One such concern is that the proposed CIP claims inventions that are claimed in previously filed applications of different inventive entities, and these applications are not commonly owned. Priority claims based upon these previously filed and separately owned applications do not overcome conflicts where the same invention is being claimed.

BELL SELTZER PARK & GIBSON Therese A. Brown, Esqs. September 23, 1994 Page 2

In our opinion, the claims in the CIP should be limited solely to joint inventions of Dr. Harris and Synergen inventors. Sole inventions not claimed in previously filed applications should be claimed in separate applications. Claims of the joint inventive entity should be patentably distinct from the subject matter disclosed in Synergen's and Shearwater's praviously filed and separately owned applications. The pravious separately owned applications of Synergen and Shearwater and Synergen's permitted international application, PCT/US92/02122; which was published on October 1, 1992, which is more than one year before the filing date of June 16, 1994 of the proposed CIP, are ill prior art documents to be applied against any joint claims for whatever the documents disclose.

Please do not hesitate to contact us if you have questions or comments on the above matters.

Best regards.

Very truly yours,

Paul F. Pedigo
